

WRA 110
Writing: Science and Technology

Lived Experiences Project Drafting Activity

1. What is the purpose of your project? What will you be trying to argue/accomplish?
2. Describe your major or a major you are considering.
3. Describe one piece of technology and its impact of your academic/career path.
4. Describe an anecdote/episode that is relevant to your project's purpose.
5. Explain how this episode relates to your project's purpose.
6. Using what you have written above, in a separate document draft a rough sketch (300-500 words) of your project that incorporates the purpose of your project, the components of your project as described above, and the analysis of the relationship between your anecdotes and the purpose of your project.
